SHOOT

1 EYE LEVEL

Get their "point-of-view".

The GoPro is known as a point-of-view camera, so use it to get a **point of view**!

2 HOVER LEVEL

Be like a drone.

Hold your camera above the scene you're trying to capture for a makeshift **drone angle**!

3 PLAY LEVEL

Capture the action.

It's easy to capture what's going on by getting **down and dirty** where the action is happening!

- ◆ Avoid boring footage by capturing your experiences from interesting angles.
- ◆ This will make your final movie captivating and fun to watch, and much more fun to edit!
- ◆ A classic mistake is shooting from your own perspective. Mix it up by shooting from the subject's **eye level**, go higher for **hover level**, or get down and dirty with **play level**.
- ◆ But what if you are the subject? Mix up your angles with a **Head Strap Mount**, a **Jaws Clip** mounted up high, or a **Suction Cup Mount** down below. **Sticky Mounts** work great for most angles as well.

SHAPE

4 CREATE A STORY

You don't have to be Steven Spielberg to direct a great movie!

Basic premise for an awesome GoPro movie:

- we went some place cool
- we did some fun stuff
- it was awesome

5 EDIT SELECTIONS

Editing footage means cutting the boring parts and saving the good stuff!

Trimming clips in GoPro Studio is easy:

- split clips as needed
- mark your in points
- mark your out points

6 ADD TO STORY BOARD

The story board is where your movie comes to life!

- Add your clips to your story board in the order you want them to appear in your movie.
- Rearrange as your please until you have a great story on the board.

7 MAKE IT AWESOME

GoPro Studio has a ton of options to spruce up your movie and make it awesome!

- music & titles
- transitions between clips
- slow motion & fast motion
- color correction
- framing & zooming

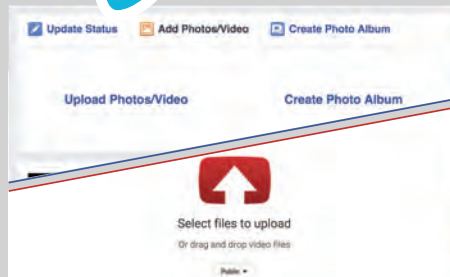

SHARE

8 EXPORT

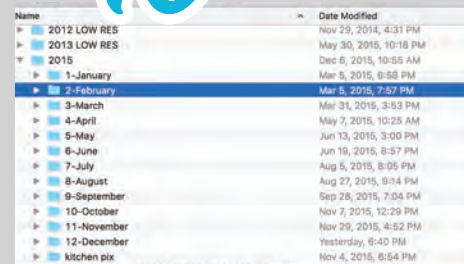

Exporting your movie allows you to save it on your hard drive as a .mov file so it can be archived, viewed later or uploaded online.

9 UPLOAD

Uploading your movie online for friends and family to see is a great idea! You can make your movie public or adjust your settings to maintain privacy.

10 ARCHIVE

Take sharing one step further and save your movie onto a DVD, an external hard drive, or an online backup service. Save your movies they can be shared with future generations!
