

# VSDC Cheat Sheet for Beginners

by VIDPROMOM

First things first: Download VSDC free at [videosoftdev.com!](http://videosoftdev.com/)

Next steps: on the top left, choose **New Project**

1. Give your project a name
2. Set your resolution and frame rate (I do 1920x1080 / 30 fps)
3. Hit "Blank Project"
4. Finish

To import your footage, choose Add Object, and then at the bottom of the menu, choose Video. Locate your clips on your hard drive and choose which ones to import.

You're on your way to editing your videos with VSDC!
