Adobe Premiere Elements Cheat Sheet

START A NEW PROJECT

➔ Always pull your clips off your memory card and onto your hard drive first
➔ Organize your footage & gather your media
➔ Start a new project and import your footage, photos, and music

EXPORT YOUR VIDEO

➔ Export at your desired resolution and compression settings
➔ It's usually a good idea to export as a file, then share online
➔ Archive your video file and save your project if you want to edit it again later

MORE TIPS AND RESOURCES

➔ **Best of the Best and Fill in the Rest** – Start by selecting the highlights first (best of the best) then fill in with other footage (the rest)
➔ **Choose your background music first** – It's so easy and fun to create a video with music. Pep up your video with background music to help "set the mood" in your movie. Click here for Where to Find Background Music.
➔ Make your videos **fun to watch** by including lots of different angles and elements. Form an easy story: we came somewhere, we did something, it was awesome, the end.
➔ Find more **Premiere Elements Tutorials** on the VidProMom YouTube Channel.
